

Lead Energy Champion 3 month ISO 50001 Programme

“An ISO 50001 energy management system through people is often the secret to locking in continual improvement and longer-term organisational and behaviour change”

Aim: on the job training and support for lead energy champions to develop the confidence, skills and performance required to deliver an effective and continually improving energy management system for their work areas and organisation.

Energy champion leadership programme # Developing ISO 50001 energy management systems through people # Energy reviews # Strategic management systems and control # The catalyst for change # Energising behaviour change # Preventative maintenance # Design, procurement & operational control opportunities # Embedding continual improvement long-term.

The programme caters for those:

- > Energy champions and change makers tasked with leading efforts for continual energy performance improvement across their local teams, work areas and organisations.
- > Teams tasked to develop an energy management system to the ISO 50001 international energy management system standard.
- > Experienced energy champions and users looking to develop their energy leadership skills for effective energy management systems and continual energy improvement.

Choose topics from at least 6 modules to create your training journey plan, depending on your objectives.

Content: Strategic management systems and control; Policy drivers, legal and other requirements; Energy performance that works for you: Energy reviews; The catalyst for change; Energy management team; Energy performance indicators; Your objectives, targets & action plans; Monitoring, measurement & analysis; Behaviour change; Design, procurement & operational control opportunities; Management reviews; Embedding continual improvement long-term.

Covered: Buildings; Estates; Industry; Transport; Heating, ventilation and air-conditioning systems; Lighting systems; Control systems; Motors & drives; Process systems; User equipment.

Bespoke: We can tailor make the training programme and coaching and support as required.

Commitment: 30 guided learning hours; typically run over a 3 month programme based around monthly 1 day workshops. This can be extended out to 12 months, depending on your aims and objectives.

Delivery: At your site, an off-site location, online or a combination of these.

Qualification: Lead Energy Champion ISO 50001 Energy Management System Certificate awarded by ESTA, the Energy Services and Technology Association
